**New Liner Bond offers a Cost Effective, Fast & Easy-to-Use Insulating Adhesive for  
Fiberglass Liners in Refrigerated Trailers**

*St. Louis, Missouri* – Convenience Products, manufacturer of Touch ‘n Seal insulating foam products introduces new Liner Bond one-component cylinder adhesive. Liner Bond is a highly adhesive, portable, gun-applied spray polyurethane foam used to bond fiberglass liners in refrigerated trailers. Liner bond is safer, stronger and fills voids more completely than caulking, glues or other commonly used adhesives. This means added insulation value. The foam composition of Liner Bond fills voids in pre-sprayed foam insulation, which also increases R-value.

“Liner Bond has been tested and proven to be 5 times stronger than the polyurethane foam insulation in refrigerated trailers. This means that the insulating foam will crack and fail before Liner Bond will. It also has a 30 minute dry time,” says Larry Pennock, Vice President of Sales and Marketing. “This allows plenty of time to spray trailer walls and adjust the liner as needed before the sealant cures. It’s great over prepared spray foam insulation and aluminum posts. Liner Bond is non-flammable and contains no harmful solvents, so odors in confined trailer spaces and health concerns are not an issue. It cures completely in 24 hours, so trailers have minimal downtime,” says Pennock.

Liner Bond is portable, disposable and ideal for all refrigerated trailers, repairs in hard to reach areas, or to return old trailers to original insulation efficiency. Liner Bond is available in a 23# canister with 10’ hose and bottom load gun applicator (#4004517100) or as a refill canister only (#4004517101).

Touch ‘n Seal offers one and two-component polyurethane foam systems for use in residential and commercial air-sealing, insulating, patching and filling applications. All Touch ‘n Seal products are self-contained, portable, disposable units with no CFC’s or urea formaldehyde. Fire-resistant formulations (FR) are available. Touch ‘n Seal is available throughout the US and Canada. For a local distributor, please call Convenience Products Customer Service at 1-800-325-6180.

Convenience Products is a division of Clayton Corporation, headquartered in St. Louis, Missouri, and also manufactures Touch ‘n Foam one-component insulating foams and accessories for the do-it-yourself market.
