

OPEN FLAME & WELDING SAFETY

FOR CONVENIENCE PRODUCTS POLYURETHANE SPRAY FOAM REFILL SYSTEMS

WARNING! IMPORTANT FIRE & WELDING SAFETY PRECAUTIONS

Polyurethane spray foam will burn if exposed to high temperatures.

Always protect the foam applicator, the foam system, chemical tanks, cured foam and the surface being sprayed from any open flames, sparks or heat in excess of 240°F.

Do not smoke or weld in the area of the foam applicator, the foam system, chemical tanks, cured foam or the surface being sprayed without adequate protection for those surfaces.

Always keep an appropriate fire extinguisher available if you believe foam spraying activities may be subject to excessive heat, open flames or sparks.
